

### Científicos famosos advierten del riesgo de Robots Asesinos

#### Noticia Profética Sábado 1 de Agosto 2015

Esta noticia viene del campo de la tecnología y nos informa de una carta firmada por famosos científicos. Entre ellos el cofundador de Apple, Steve Wozniak y otros más, que están diciendo, tengamos cuidado. El hecho de **construir robots con inteligencia artificial** que puedan ser usados como soldados, como policías y como armas masivas, puede producir **una gran catástrofe en la humanidad.**

Dicen estos científicos, el construir estos robots con inteligencia artificial, puede dejar la vida de los seres humanos en la decisión de una máquina, que podrá matar a quien quiera y sin la participación directa de otro ser humano.

## Scientists worry about arms race in artificial intelligence

Jul 28, 10:31 AM (ET)

By DANICA KIRKA

LONDON (AP) — Scientists and tech experts — including professor Stephen Hawking and Apple co-founder Steve Wozniak — warned Tuesday of a global arms race with weapons using artificial intelligence.

In an open letter with hundreds of signatories, the experts argued that if any major military power pushes ahead with development of autonomous weapons, "a global arms race is virtually inevitable, and the endpoint of this technological trajectory is obvious: autonomous weapons will become the Kalashnikovs of tomorrow."

Some people have argued in favor of robots on the battlefield, saying their use could save lives. Such weapons are still years away.

But the scientists warned that, unlike nuclear weapons, once they are developed they will require no costly or hard-to-obtain raw materials — making it possible to mass-produce them.

"It will only be a matter of time until they appear on the black market and in the hands of terrorists, dictators wishing to better control their populace, warlords wishing to perpetrate ethnic cleansing, etc.," the letter said.

Imagine a future where artificially intelligent (AI) military robots decide who to kill, when and why -- entirely on their own, without human intervention. Stephen Hawking, Elon Musk and Steve Wozniak have -- and, together, they're calling for humanity to stop the terrifying possibility before it starts.
